4) Cryptographically Verifiable Consent Artefact and Immutable Audit Trail 10
5) Offline Consent Collection at Point of Sale (POS) where Personal Data Is Required 10

1. Consent Management Features

1.1 Consent Creation (Grant)

Allows Data Principals to provide consent through an embedded, secure UI. Captures purpose, data categories, processors, and validity with a digitally signed consent artifact.

1.2 Consent Update / Modification

Enables Data Fiduciaries to update purpose, processors, or processing activities. Automatically triggers a re-consent workflow ensuring the Data Principal reviews and accepts updated terms.

1.3 Consent Withdrawal

Allows users to withdraw consent at any time through dashboard or via DF-linked UI. Withdrawal is logged immutably and triggers DF/processor callbacks for data stoppage.

1.4 Consent Renewal

Automatically notifies Data Principals when consent is approaching expiration. Provides a streamlined re-approval flow with versioned artifacts.

1.5 Consent Audit Trail

Each consent action generates an append-only immutable record containing hashes, timestamps, actor identity, and cryptographic signatures for regulatory compliance.

1.6 Consent Verification API

Any DF or processor can verify the authenticity of a signed consent artifact using public keys. Ensures non-repudiation and tamper-proof validation.

1.7 Versioned Consent Records

CMS maintains a sequential chain of consent versions without changing the Consent ID. Ensures historical traceability for compliance and disputes.

1.8 Minor/Parental Consent

Supports parental consent collection for minors. A secure link is sent to the parent who completes KYC (e.g., DigiLocker) before granting consent.

2. Cookie Preference Management

2.1 Cookie Banner (Embedded)

Displays DF-branded cookie banner to collect user preference for categories like Functional, Analytics, Marketing, etc., complying with global privacy laws.

2.2 Cookie Preference Storage

Records user preferences along with category-level timestamps and device metadata in an immutable log, supporting audits and compliance review.

2.3 Cookie Preference Update/Withdraw

Allows users to revisit and modify cookie settings anytime. Updates are logged and may trigger DF-side changes to tracking scripts.

2.4 Multi-language Cookie UI

Provides cookie screens in 22 Indian languages using the Translation Service, ensuring inclusivity and regulatory alignment.

---

3. Grievance & Rights Management

3.1 Raise Grievance / Rights Request

Enables Data Principals to raise issues (access, correction, erasure, dispute). Form-driven UI ensures completeness with mandatory metadata.

3.2 Grievance Lifecycle Management

Tracks every grievance from submission to resolution with timestamps, DF updates, DPO escalations, and SLA monitoring.

3.3 Grievance Artifact Signing

Each grievance submission generates a signed, immutable artifact for audit and legal verification. Protects both DF and Data Principal.

3.4 DF & DPO Workflow Integration

CMS allows DF admins to update status as In-Progress, Resolved, or Escalated. Automated SLA-based reminders and DPO escalation workflows ensure timely closure.

---

4. Notification & Communication Services

4.1 Email & SMS Notifications

CMS integrates with SMTP and SMSC gateways to deliver consent, cookie, grievance, and renewal notifications. Includes templates and multi-language support.

4.2 DF & Processor Callbacks

Events like consent grant, update, withdrawal, renewal, and grievance submissions are pushed to DF/processor systems via secure webhook callbacks.

4.3 Dead-letter Queue & Retry

Failed notifications are queued for retries with exponential backoff. Ensures reliability and delivery guarantees at scale.

---

5. Audit & Compliance

5.1 Immutable Audit Logging

Every CMS activity (user, system, API) is recorded in an append-only, hash-linked structure to ensure audit integrity and tamper-proof evidence.

5.2 Compliance Dashboard

Legal entities get real-time visibility into logs, SLA breaches, privacy violations, and system health to meet DPDP and internal governance needs.

5.3 Cryptographic Chain Verification

Supports recomputation of SHA-256 hash chain to validate whether any consent or grievance record has been tampered with.

---

6. CMS Portal & Admin Console

6.1 Tenant & Legal Entity Onboarding

Each DF is provisioned as an isolated tenant with dedicated database and configuration setup. PAN-based uniqueness ensures regulatory compliance.

6.2 Configuration Management

CMS provides system setup for SMTP, SMSC, callbacks, templates, DPO information, retention policies, multilingual preferences, and signing settings.

6.3 Business Application & Role Setup

Legal Entity Admin can create business groups, define roles, assign permissions, and onboard users to control access to CMS modules.

6.4 Dashboard & Activity History

Shows consolidated operational metrics including consents collected, grievances open, callbacks delivered, notification usage, and audit summaries.

---

7. Identity, Access & RBAC

7.1 DF User Authentication

DF users log in via PAN + email/phone OTP. Ensures secure but simple access to CMS portal.

7.2 Role-Based Access Control

Supports configurable roles like Legal Entity Admin, Business Admin, Operator, and Auditor with object-level access control.

7.3 Session & Token Management

OAuth2-based token issuance, session timeout enforcement, correlation ID tracking, and signing of responses for integrity.

---

8. Integration Framework

8.1 Callback & Webhook Management

DFs can configure URLs to receive events for consent, grievance, and status changes. Webhooks include JWS signatures for authenticity.

8.2 SecureCode Generator API

Generates time-bound secure access tokens for embedded consent, cookie, and grievance journeys used inside DF's platform or app.

8.3 JS Widget Integration

Provides DF websites with a JS bundle to embed consent/cookie UI without handling logic internally.

8.4 DigiLocker Integration

Used for parental KYC and identity verification where required under minors' consent law.

8.5 Bhashini AI Integration

Provides fast, reliable translation for consent templates, cookie text, grievance forms, and notifications in 22+ languages.

8.6 Vault & WSO2 Wrappers

Platforms abstract Vault for key management and WSO2 for credential generation, enabling secure signing and identity provisioning.

---

9. Cross-Cutting Platform Services

9.1 Scheduler / Workflow Engine

Monitors consent expiries, SLA deadlines, renewal reminders, escalation flows, and scheduled reports.

9.2 Translation & Localization Service

Ensures all UI modules support multilingual content and accessibility (WCAG 2.1 AA aligned).

9.3 HashiCorp Vault Wrapper

Securely stores RSA keys, encrypts payloads, signs artifacts, and manages versioning without exposing raw keys.

9.4 WSO2 Credential Wrapper

Generates client credentials for DF onboarding and securely rotates keys as per policy.

1. Key Differentiator of Proposed Consent Platform

1) Certificate 65B

a. Certificate 65 B can be downloaded for consent immutability.

2) Impanelled Agency VAPT Certified

3) **Granular Consent Customization**

Enable users to give purpose-specific, time-bound, and revocable consent per data type with intuitive dashboards that translate legal jargon into human-friendly language.

4) **Cryptographically Verifiable Consent Artefact and Immutable Audit Trail**

Generates cryptographically verifiable consent artefacts (Digitally Signed by the Consent Platform). Generates with timestamped immutable logs, ensuring compliance audit readiness.

5) Offline Consent Collection at Point of Sale (POS) where Personal Data Is Required

a. Ideal for hotels, jewellery showrooms, and retail outlets, It empowers businesses to securely collect consent from walk-in customers when personal data is needed. The system generates a time-bound consent request that can be shared via SMS, WhatsApp, Email, or displayed as a QR code at the counter. Customers can scan or open the link on their device to review and approve, ensuring compliance, convenience, and a frictionless in-store experience.
